CAREER OBJECTIVE

A passionate full stack developer with a strong foundation in building responsive and modern web applications using Next.js/React.js and Express.js and MongoDB for Backend. Eager to join a dynamic team to contribute to project success while continuously learning modern web technologies.

TECHNICAL & SOFT SKILLS

Frontend: Next.js/React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, SQL

Soft Skills: Time Management, Teamwork, Fast Learner, Communication.

Others: Shadcn, Axios, Fetch API, TanStack Query, AOS, Framer Motion, Recharts, Nodemailer.

Internship Experience

Risetogether – Frontend Developer Intern | March 1 – June 30

- Built responsive and modern UI using **Next.js**, **TypeScript**, and **shadcn/ui**.
- Developed reusable components and maintained clean, scalable code.
- Collaborated with team members to implement features and integrate APIs.
- Ensured smooth user experience and performance optimization.

Project Contribution:

Feletrip – Hotel Booking Platform

[Live](#)

- Contributed to a hotel booking platform where users can add their own hotels and book available rooms.
- Implemented dynamic data handling and API integration for listing and booking functionality.

Technologies used: Next.js, TypeScript, shadcn/ui, Tailwind CSS

Personal Projects

AS Everything Shop– Clothing eCommerce Platform | June 20 - July 1

[Live Link](#) | [Client](#) | [Server](#)

AS Everything Shop is a modern online clothing store designed to simplify product ordering and inventory management while providing real-time order notifications and customer engagement features.

- **Real-Time Email Notification System:** Integrated Nodemailer to instantly send order confirmation emails to customers and order alerts to administrators after successful purchases.
- **Customer Review & Rating System:** Enabled authenticated users to submit product reviews and ratings to improve transparency, trust, and user engagement.

Technologies used: React.js, Tailwind CSS, Axios, Node.js, Express.js, MongoDB, Nodemailer

ScholarStream – Scholarship Management Platform | December 7 - December 18

[Live Link](#) | [Client](#) | [Server](#)

ScholarStream is a comprehensive platform designed to streamline global scholarship applications, offering a secure environment for students and robust management tools for administrators.

- **Role-Based Access Control (RBAC):** Implemented three distinct user roles (Admin, Moderator, Student) with dedicated dashboards and secure route protection.
- **Secure Payment Integration:** Integrated **Stripe** for seamless scholarship application fee processing, including automated status updates for successful or failed transactions.

Technologies used: React.js, Tailwind CSS, Firebase, TanStack Query, Stripe, Axios, Framer Motion, Chart.js, JWT

EDUCATION

Diploma in CST ,

Rangpur Polytechnic Institute, CST (5th Semester) - Current

Complete Web Development With Programming Hero Level-1(Complete) & Level-2 (Running) [Certificate](#) | [Achievement](#)
